Germaplast IZERNORE

Franleal Group Plastic industry

GERMAPLAST is part of a French family group founded in 1974.

Expert in plastics processing, decoration, and overall project management, we strive to bring you innovation and competitiveness in your packaging projects.

Our manufacturing processes by mono and bi-injection, In Mold Labelling (IML), offer many possibilities for development, assembly, packaging with the most complex shapes and materials.

With a fleet of 30 electrical machines from 50 to 400T, we offer productions in small, medium and large series.

GERMAPLAST IN NUMBERS

- Revenue 2024 – 2025: €20,000 K
- Certification: ISO 9001 - ISCC+ – Ecovadis (Silver)
- Staff: 60 employees
- 30 Electric presses, single & dual material
- Automatic assembly machines
- 8,000 M2 of industrial buildings

New industrial building

- ✓ **Optimization** of production flows
- ✓ **Better control of stock**
(Input/output)
- ✓ **Enhanced quality control**
- ✓ **Reduction of processing times**

- ✓ Space available for the integration of **new means of production**
- ✓ Increased **storage capacity**
- ✓ **Enhanced competitiveness**
- ✓ Increased **reliability**
- ✓ Production **flexibility**
- ✓ Ability **to absorb** the increase in load

Automated assembly machine

- ✓ **Production capacity:** 18 900 caps / day
- ✓ High-speed **automated assembly**
- ✓ **Retrofit** for the assembly of all types of hoods
- ✓ **Flexibility** to support future projects
- ✓ Enhanced **quality and repeatability**
- ✓ **Adaptability** to changes in your products

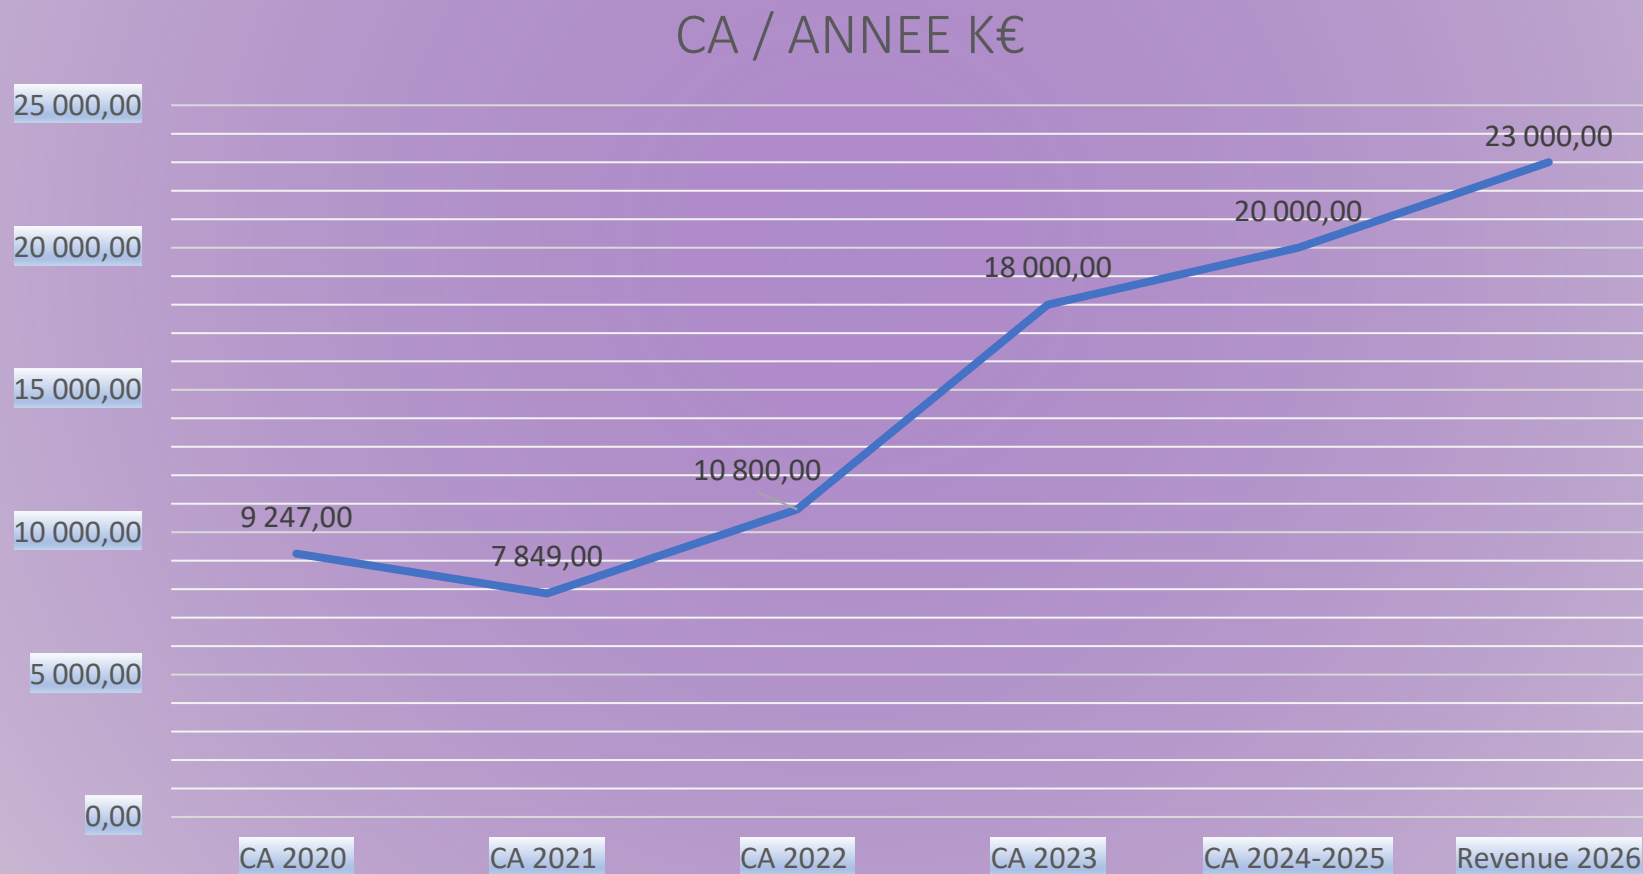

GERMAPLAST is renewing its workshop, with 9 new electric machines acquired in 2020-2021

Progress in the
automation of
assemblies,
mechanics, UV and
hot melt bonding, 4th
machine

Our evolution in Numbers

Corporate Social Responsibility

CSR is at the heart of our strategy and guides each of our decisions.

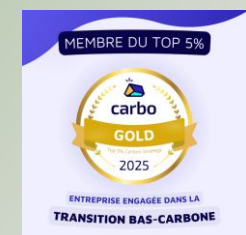

It is based on three pillars: Human, Responsible Performance and Respect for the Environment.

Développement durable

2023: ISCC+ re-certification for the use of mass balance materials derived from bio-based production such as Polyolefin (PP) + Vegetable oils or Used edible oils – R-PET – R-PBT.

ALTERNATIVE STUDY TO ZAMAK

AMOUAGE perfume (Men & women – magnetic capsule oriented)

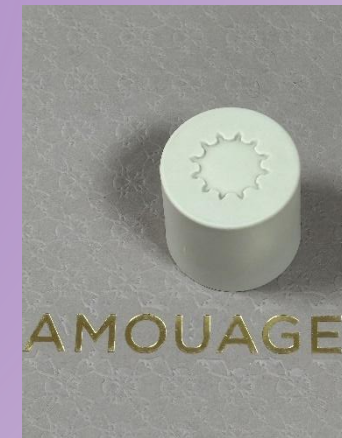

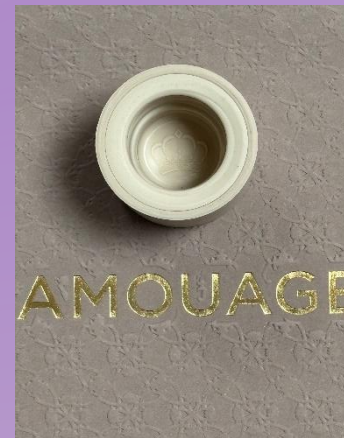

Relocation (Asia => Europe)

Process overmolding sintered metal insert

Replacement of the Zamac by galvanized plastic (selective Galva)

3 new Amouage ESSENCE

KYLIE FRAGRANCE
