Verified safety and compliance information for
1.7M+
products

More than
8,000
global regulatory lists

Access to
260,000+
materials across 10 industries

Digitally connects suppliers and manufacturers with more than
123,000
monthly active users

Sustainability

ULTRUS environmental, social and governance (ESG) software, advisory, and verification services empower organizations to achieve safer, more sustainable performance.

Capabilities include:

- ESG data management and comprehensive reporting
- Sustainability regulatory compliance and disclosure
- Sustainability reporting
- ESG performance tracking
- ESG-related risk management
- Stakeholder engagement
- Supply chain transparency
- Corporate social responsibility management
- Carbon accounting and strategic reduction
- Purchased Goods and Services emissions

“Overall, it was an easy and successful experience. We enjoyed the conversations that we had with the UL Solutions team and saw an excellent opportunity to have a good relationship for the long term. There are a lot of software options out there, and we worked diligently to find one that made sense for our business.”

— Emily Pronchik
Sustainability Engineer, FMC Corporation

Energy

From prospecting optimal locations to importing and analyzing resource data, ULTRUS Energy helps reduce risks and secure bankability for the development of wind, solar and storage projects.

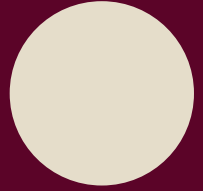

Capabilities include:

- Efficiently optimize battery storage for solar and wind energy systems
- Model battery lifetime and capacity
- Holistic modeling of electricity markets worldwide

Built on UL Solutions' proprietary 200-meter resolution mesoscale mapping system

"We are amazed at both the thoroughness of the software and the design complexity that it allows us to relatively evaluate. To our knowledge, there is no other software on the market that matches HOMER for the purpose of designing renewable energy systems."

— Lisa Michael,
Renewable Energy Systems,
Anchorage, AK

Learning

ULTRUS Learning pairs quality content and learning management to provide an end-to-end learning experience. Bring practical knowledge, regulatory training and workplace safety expertise to your organization.

Capabilities include:

- LMS for workplace safety
- Validated LMS for life sciences
- Content library for workplace safety and FDA regulations, GCP, and HIPAA training
- Audit readiness and reporting
- Employee and supplier qualification monitoring
- Create and edit courses
- AI-powered training quiz creation
- AI-powered content transcription and translation

700M+

ComplianceWire®
courses taken

400+

life sciences courses
to choose from

Health

ULTRUS Health enables employers to streamline workplace incident and case management, compliance and document management. It offers occupational health clinics a purpose-built electronic medical record and documentation system to simplify patient encounters and billing.

Capabilities include:

- Occupational health case and incident management
- Regulatory compliance support
- Electronic medical records

Generate 837 professional and institutional claims

“SYSTOC and its audit functions help us manage reimbursement by ensuring that we have adequate documentation for work injuries. And it helps us with client company communications.”

— Phillip Greene, program director,
West Georgia Worx
